MD-PREMIUM.NET GEO

MD-Premium.NET Geo Data Management is a comprehensive information system for itinerary planning, live tracking and more – the perfect addition to MD-Premium.NET CRM and ERP.

HIGHLIGHTS

Itinerary planning
Itinerary planning via Bing Maps, calculation of route lengths and durations, map view

Live tracking
Visualisation of travelled and current itineraries based on GPS data

Resource management
Calculation of itineraries, assignment of vehicles to orders

Service management
Management of maintenance routes, map view of customer locations

✓ **Itinerary planning:** Detailed itinerary planning via Bing Maps | Integration of orders, vehicles and breakpoints

✓ **Filter view:** Freely definable filters to display specific customers from MD-Premium.NET ERP and CRM on the map, e.g. high-value customers in a specific region

✓ **Itinerary planning according to maintenance requirements:** View of equipment in need of maintenance and corresponding itinerary planning

✓ **Live tracking:** Live map view of vehicles | Visualisation of travelled routes | Detailed statistics

✓ **Import of shape files** to display various kinds of data, such as retailer branches, charging stations for electric vehicles, POIs, etc.

✓ **Automatic calculation of arrival, departure and waiting times** based on specified breakpoints on the route
